Big Data Hadoop Stack

Lecture #1

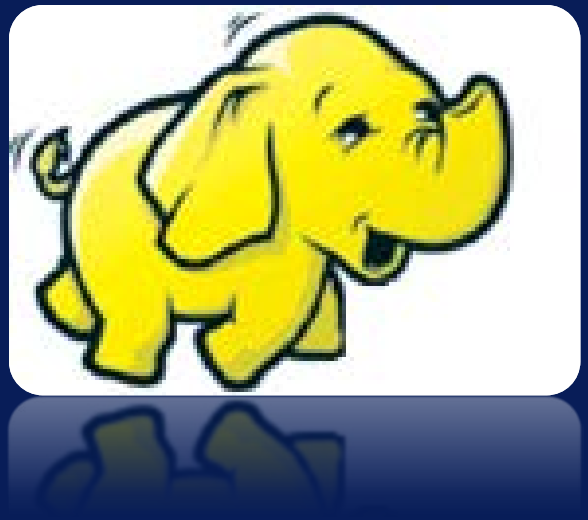
Hadoop Beginnings

What is Hadoop?

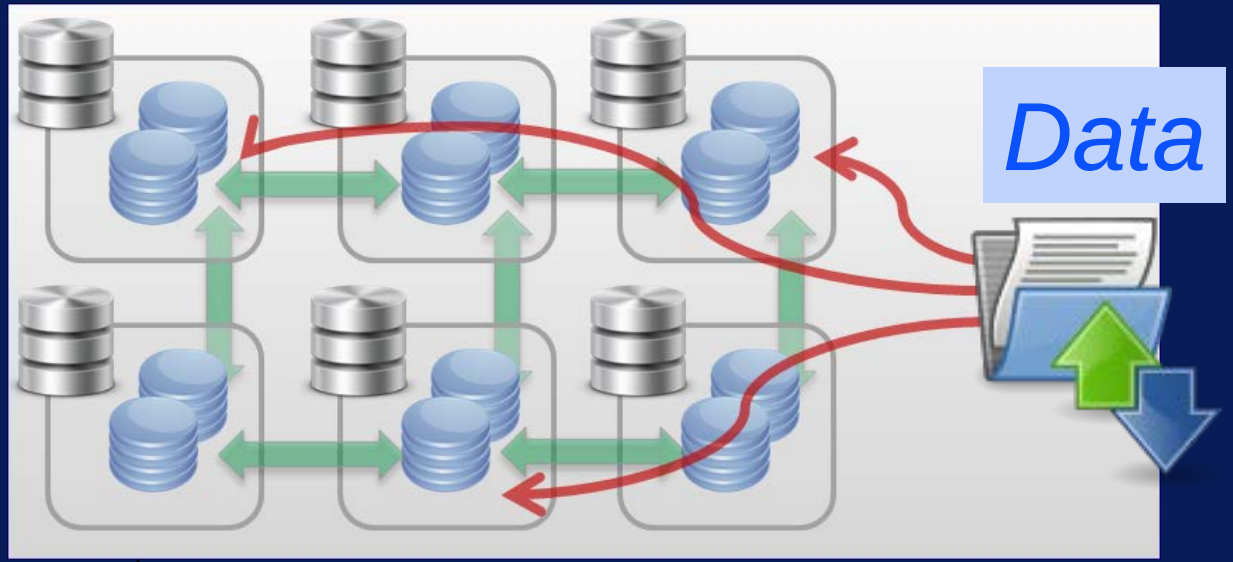
Apache Hadoop is an open source software framework for storage and large scale processing of data-sets on clusters of commodity hardware

Hadoop was created by Doug Cutting and Mike Cafarella in 2005

Named the project after son's toy elephant



Moving Computation to Data



Computation

Scalability at Hadoop’s core!

Large Data & Simple Algorithm

Lecture #2

Apache Framework Hadoop Modules

Apache Framework Basic Modules

- **Hadoop Common**
- **Hadoop Distributed File System (HDFS)**
- **Hadoop YARN**
- **Hadoop MapReduce**

Apache Framework Basic Modules

Hadoop Common

Hadoop Distributed File System (HDFS)

Hadoop YARN

Hadoop MapReduce

Apache Framework Basic Modules

Hadoop Common

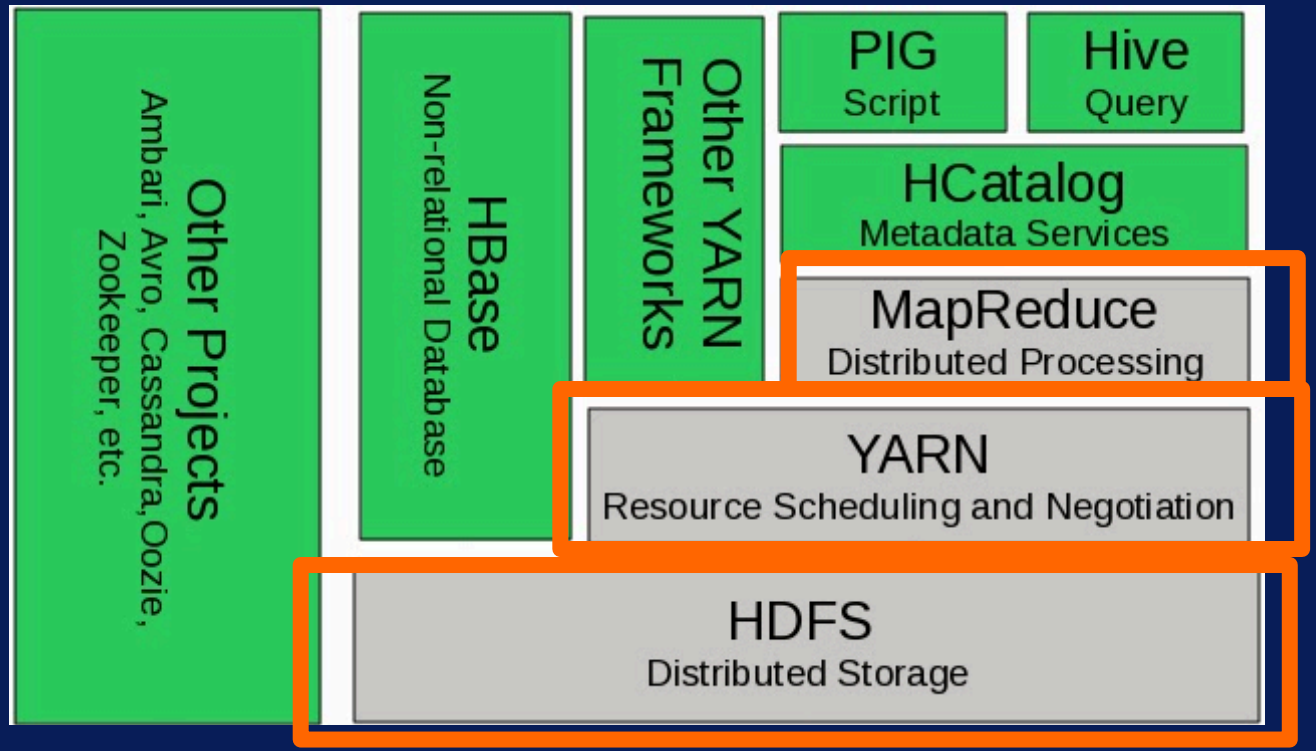
Hadoop Distributed File System (HDFS)

Hadoop YARN

Hadoop MapReduce

Apache Framework Basic Modules

- Hadoop Common
- Hadoop Distributed File System (HDFS)
- Hadoop YARN
- Hadoop MapReduce



Other Projects
Ambari, Avro, Cassandra, Oozie, Zookeeper, etc.
HBase
Non-relational Database
Other YARN Frameworks
PIG
Script
Hive
Query
HCatalog
Metadata Services
MapReduce
Distributed Processing

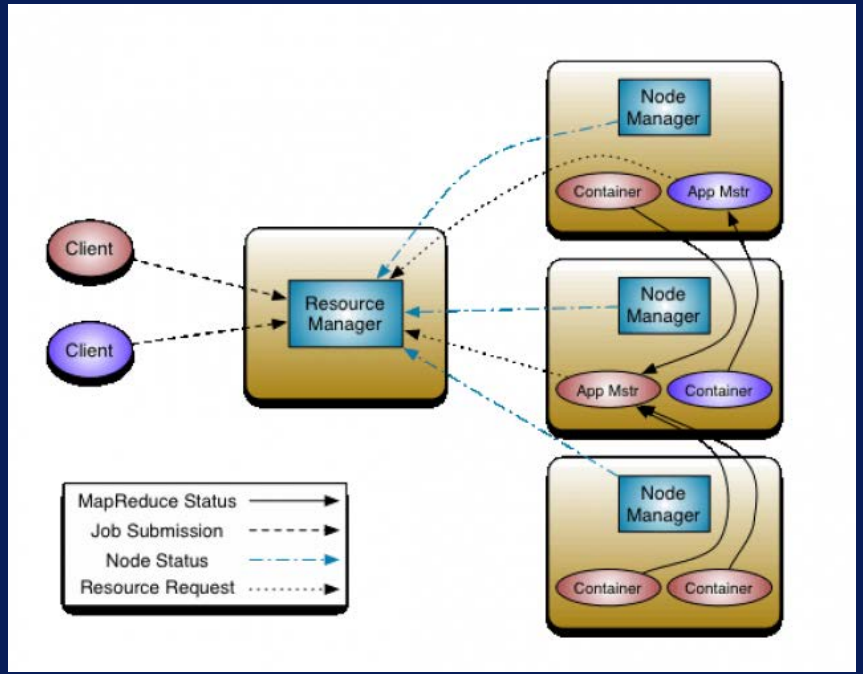
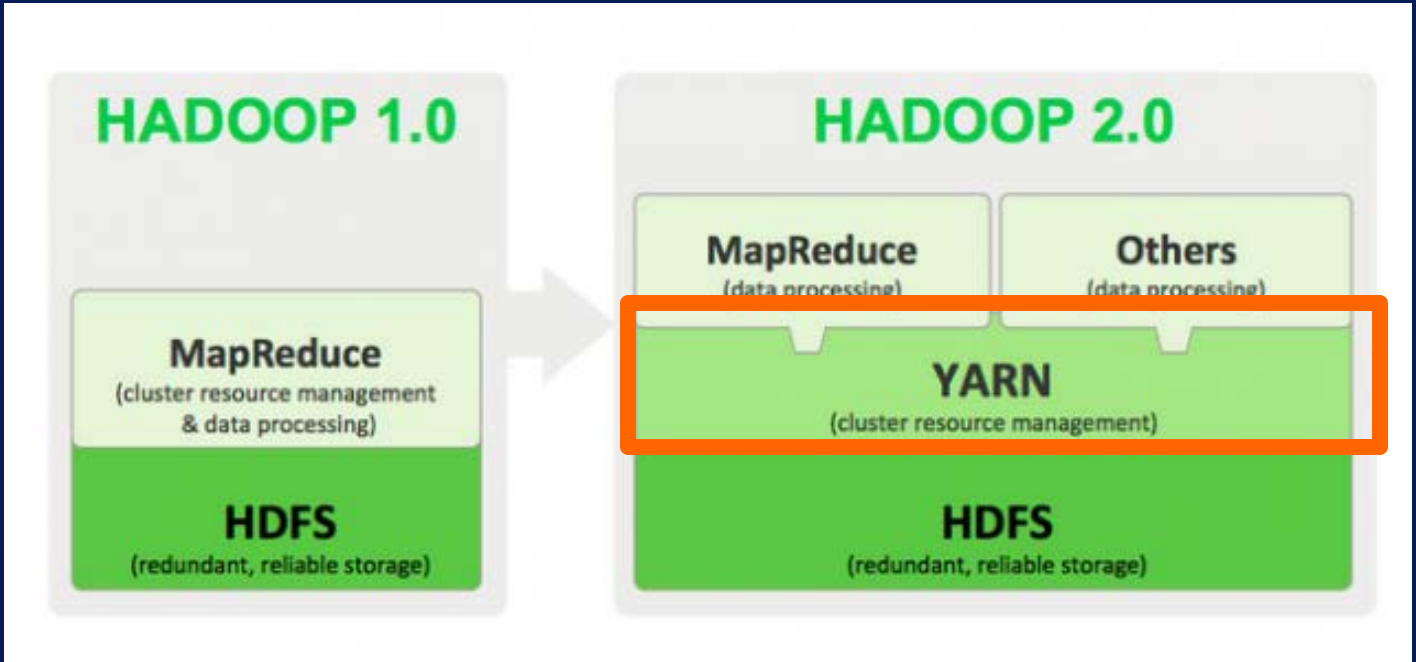
Apache Hadoop NextGen MapReduce (YARN)





HADOOP 1.0
MapReduce
(cluster resource management
& data processing)
HDFS
(redundant, reliable storage)
HADOOP 2.0
MapReduce
(data processing)
Others
(data processing)
YARN
(cluster resource management)
HDFS
(redundant, reliable storage)

What is Yarn?

- **YARN enhances the power of a Hadoop compute cluster**

Scalability

What is Yarn?

- **YARN enhances the power of a Hadoop compute cluster**

Scalability

Improved cluster utilization

What is Yarn?

- **YARN enhances the power of a Hadoop compute cluster**

Scalability

Improved cluster utilization

MapReduce Compatibility

What is Yarn?

- **YARN enhances the power of a Hadoop compute cluster**

Scala

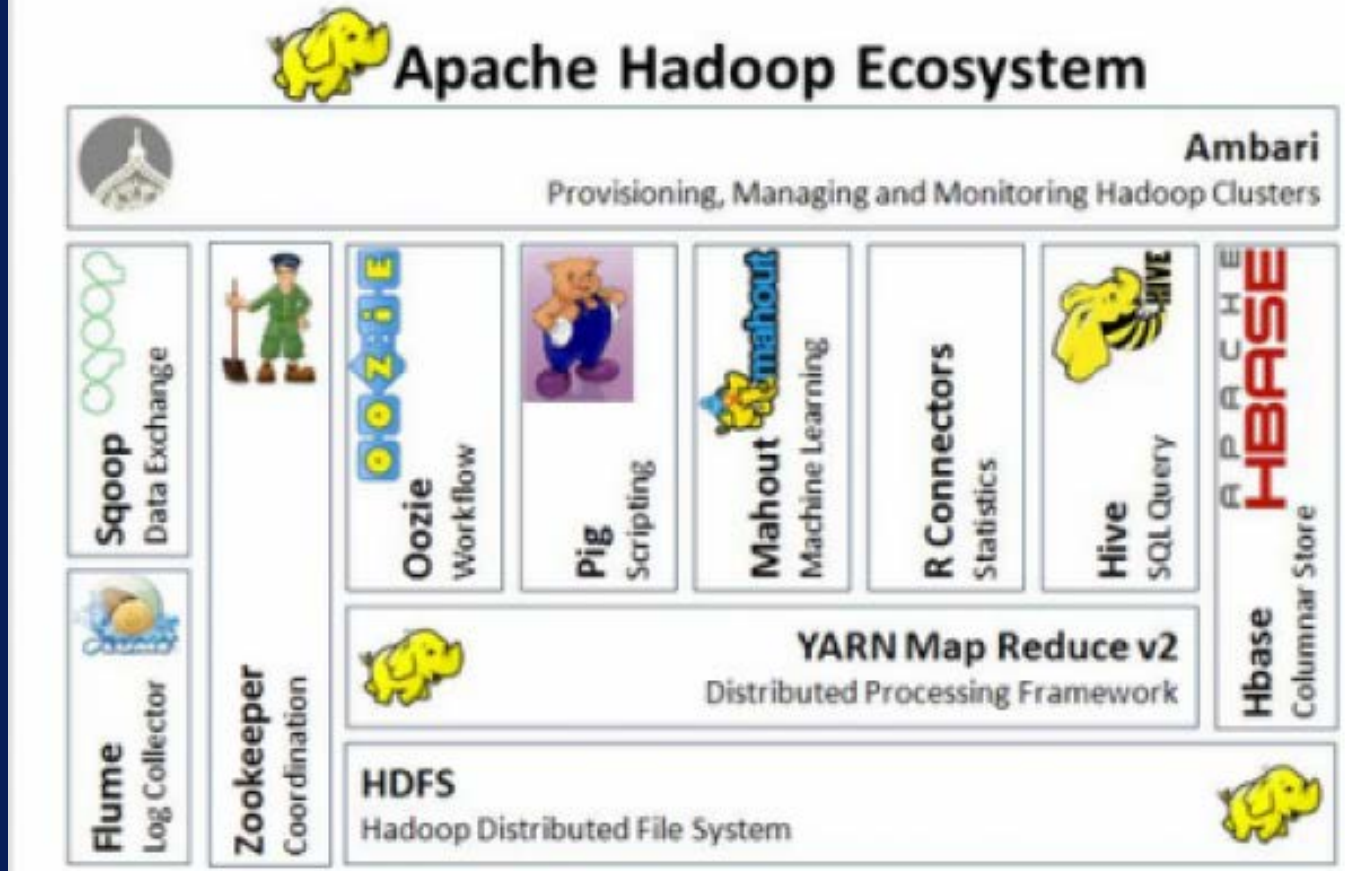
Improved cluster utilization

Map

Supports Other Workloads

Lecture #4

The Hadoop “Zoo”



Apache Hadoop Ecosystem
Ambari
Provisioning, Managing and Monitoring Hadoop Clusters
Sqoop
Data Exchange
Flume
Log Collector
Zookeeper
Coordination
Oozie
Workflow
Pig
Scripting
Mahout
Machine Learning
R Connectors
Statistics
Hive
SQL Query
Hbase
Columnar Store
YARN Map Reduce v2
Distributed Processing Framework
HDFS
Hadoop Distributed File System

How to figure out the Zoo??

Distributed Processing Framewor
HDFS
Hadoop Distributed File System

HBASE

- Column-oriented database management system
- Key-value store
- Based on Google Big Table
- Can hold extremely large data
- Dynamic data model
- Not a Relational DBMS

YARN Map Reduce v2
Distributed Processing Framework
HDFS
Hadoop Distributed File System

Apache Hive

- Data warehouse software facilitates querying and managing large datasets residing in distributed storage

Apache Hive

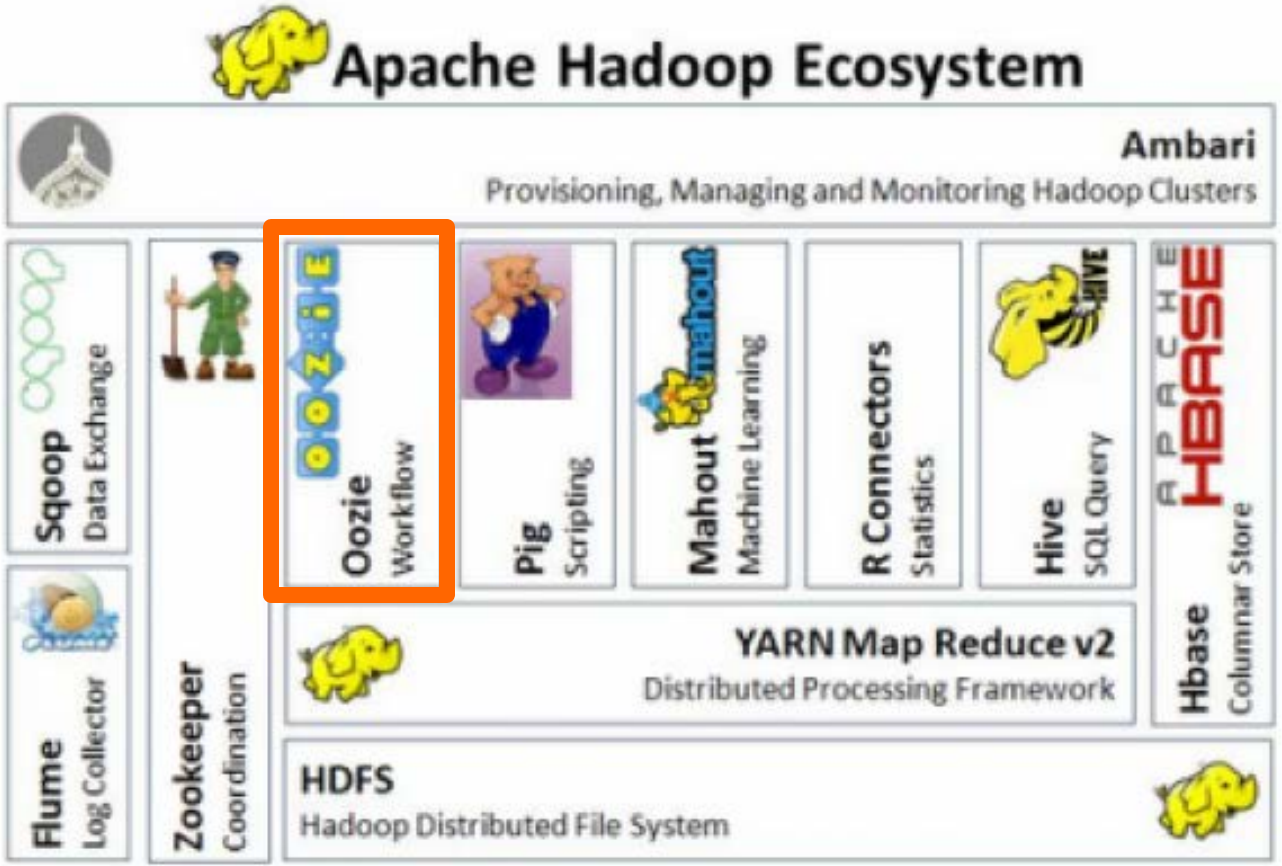
SQL-like language!

Apache Hive

Facilitates querying and managing large datasets in HDFS

Apache Hive

Mechanism to project structure onto this data and query the data using a SQL-like language called HiveQL



Apache Hadoop Ecosystem
Ambari
Provisioning, Managing and Monitoring Hadoop Clusters
Sqoop

Zookeeper

Provides operational services for a Hadoop cluster group services

Zookeeper

Centralized service for:

maintaining configuration information

naming services

providing distributed synchronization

and providing group services

Zookeeper

Centralized service for:

maintaining configuration information

Zookeeper

Centralized service for:

maintaining configuration information

naming services

Zookeeper

Centralized service for:

maintaining configuration information

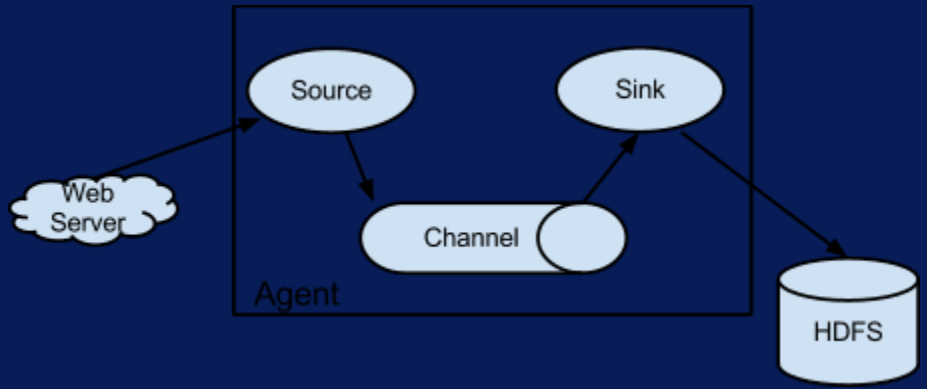
naming services

providing distributed synchronization

and providing group services

Flume

Distributed, reliable, and available service for efficiently collecting, aggregating, and moving large amounts of log data



Additional Cloudera Hadoop Components

Online NoSQL (HBase)
DATA INTEGRATION (Sqoop, Flume, NFS)

Spark

Apache Spark™ is a fast and general engine for large-scale data processing

Spark Benefits

Multi-stage in-memory primitives provides performance up to 100 times faster for certain applications

Spark Benefits

Allows user programs to load data into a cluster's memory and query it repeatedly

- Well-suited to machine learning!!!
